**Edge Form Bracket 6x7***

Reversible and reusable cup-style plastic brackets for bracing tilt-up panel edge forms

Stop cutting lumber blocks for bracing and start forming faster with the reusable Edge Form Bracket.

The one-piece plastic design is a wedge-shape that braces tilt-up edge forms. The Edge Form Bracket has a 6” side for thinner slabs (6” to 8”) and a 7” side for thicker slabs (8” to 12”).

Both sides of the Edge Form Bracket have a flat surface with three holes for attachment. Once placed, the flat surfaces can be nailed, screwed or glued to the lumber and concrete.

The tops of the Edge Form Brackets should always be positioned below the overall form height so they do not interfere with concrete screeding or finishing.

The Edge Form Brackets are removed when forming is complete, then cleaned, stacked and saved for the next project.

**Tack It** - Edge Form Brackets* have sides with holes for nail attachment to lumber and concrete. 1/4”x1” plastic nails are available.

**Stick It** - Edge Form Brackets have flat sides for Spray Adhesive or Sticky Pad attachment to lumber and concrete surfaces.

**Scrape It** - Edge Form Brackets can be removed from surfaces with a long-handle scraper and cleaned.

**Stack It** - Edge Form Brackets “nest” together for handling and storage.
