

Hardware Basket

Sturdy steel mesh containers for sorting, stacking, storing and moving inventory

Reduce the handling time of heavy forming items or other industrial parts with an all-steel, all-purpose Hardware Basket.

The mesh sides allow quick parts identification, the welded construction protects items during transit, and the stacking legs minimizes floor space.

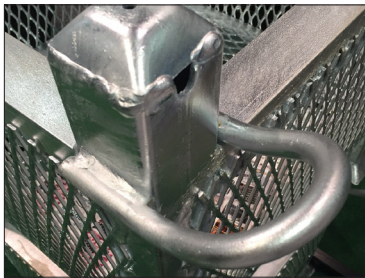

It's easier to keep inventory organized and accessible with a Hardware Basket.

Sturdy steel mesh containers hold up to 3,500 lbs for sorting, stacking, storing and moving parts.

Galvanized mesh resists corrosion and permits any dirt to fall through the openings.

Corner lugs provide reliable attachment points for lifting and moving the basket.

| Hardware Basket* | | | |
|------------------|---------------------------|-------------------|--------------|
| Part No. | Description | Basket Dimensions | Weight (lbs) |
| SBJSRBL | SB Hardware Basket - Full | 44"x44"x34-1/2" | 330 |
| SBJSRBHL | SB Hardware Basket - Half | 44"x44"x26" | 300 |

* Basket load capacity is 3,500 lbs.
