General Notes

1. Product Codes and List Prices for customer reference.
2. Freight is F.O.B. Bellwood, IL, unless noted otherwise.
3. Appropriate Safe Working Load noted with each product.
4. "Flag" indicates those items are manufactured in USA with some exceptions.
5. Product modification may compromise performance. Contact SureBuilt Engineering before making field alterations.

Freight Classification Chart

NMFC	NMFC DESCRIPTION	LTL CLASS
75915SUB2	Forms or Molds N.O.I. Concrete	50
75915SUB3	Forms or Molds N.O.I. Concrete	50
75915SUB4	Forms or Molds N.O.I. Concrete	50

105210	Iron and Steel Fixtures for Concrete Retaining or Supporting (Braces, Brackets, Clamps, Clips, Hooks, Wedges, Walers)	60

Safety Notes

SureBuilt products are intended for use by trained, qualified and experienced users only. Misuse or lack of supervision and/or inspection can contribute to serious accidents or deaths. Any application other than those noted in this publication should be tested and supervised before use.

The user of SureBuilt products must evaluate the application, determine the safe working load and control all field conditions to prevent load in excess of product(s) capacity. Safety factors shown in this publication are approximate minimum values. The data used to develop safe working loads for products is a combination of actual testing and/or other industry sources. Do not exceed the recommended safe working loads.

Worn Parts

For safety, products and accessories must be properly used and maintained. Products may be subject to wear, overload, corrosion, deformation, alteration and other factors that may affect performance. It is the responsibility of the user to schedule regular inspections and remove worn and damaged parts from service.

Field Modification

Field welding can compromise product performance, alter load capacities, and create hazardous situations. Do not weld unless approved by a licensed metallurgical engineer. Since SureBuilt can not control workmanship or site conditions, SureBuilt can not be responsible for any product alterations or field modifications.

Interchangeability

Products manufactured and supplied by SureBuilt are designed as a system. When used properly, SureBuilt products have proven to be among the best designed and safest in the industry. SureBuilt strongly discourages any efforts to interchange products supplied by other manufacturers because they may compromise performance and safety.

Safety Factors

Safety factors established by the Occupational Safety and Health Administration (OSHA), Act Part 1910 and American National Standards Institute (ANSI 10.9) are recommended. Contact SureBuilt Engineering regarding unforeseen site conditions. Safety factors should be adjusted when different or unusual conditions are known to exist.

Industry Safety Factor Recommendations		
Accessory	Safety Factor*	Type of Construction
Form Ties	2 to 1	Formwork over 8 ft. in height and/or hazardous to life.
Form Anchors	2 to 1	Formwork supporting form weight and concrete pressure only.
	3 to 1	Formwork supporting form weight, concrete, live load, and impact.
Form Hangers	2 to 1	All applications.
Inserts as Form Ties	2 to 1	Concrete inserts used as form ties with adjoining formwork.
Inserts	3 to 1	Permanent connections between tilt-up or precast panels.
Lifting Inserts	4 to 1	Panel handling (multiple lifts).
	2 to 1	Panel handling (single use).
Brace Inserts	2 to 1	Bracing of tilt-up or precast concrete panels.
Lifting Plates/Hardware	5 to 1	Hardware for handling and lifting tilt-up or precast panels.

* Minimum safety requirement.

Notes:

- Safe working load of Aluminum Tie is 3,750 lbs (Safety Factor 2:1).
- Fractional sizes priced to the next full dimension and available on request.
- Add \$40 for each type and size ordered in "less than 100" quantity.
- Compatible with Badger, Hartman, Wall-Ties, Western and other aluminum form system brands.

SBCR112	SB COIL ROD 1-1/2" X 12'	68,000	\$16.95	5.15

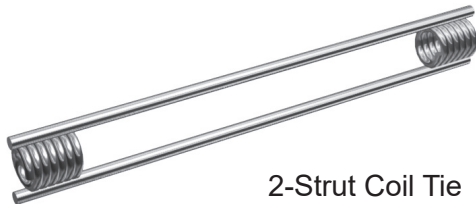

Notes:

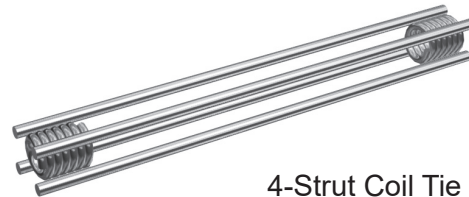

- 600 feet of 1" Coil Rod per bundle (50 pieces).
- 1200 feet of 3/4" Coil Rod per bundle (100 pieces).
- 1200 feet of 1/2" Coil Rod per bundle (100 pieces).

Coil Tie

- Designed for medium and heavy concrete forming applications.
- Resistance-welded coil tie for reliable performance and safety.
- Optional cones, waterseals, galvanizing or custom specification on request.

Price/ea	\$72.45	\$57.96	\$49.52	\$45.11

This illustration is a 7"x144" Dowel Basket, with 18" spacing. The 7" indicates the concrete slab thickness, 3-1/2" to the midpoint. The 144" is the basket length. The 18" spacing identifies plate location, 8 plates for each basket. Plates can be either 3/8"x2" or 1/2"x2-1/2" depending on project requirements, anticipated loads and slab thickness. The extended plastic plate sleeve provides corrosion protection after the joint is saw cut.

Prices and specifications subject to change without notice.

Steel Edge Nosing

Steel Edge Nosing	
Part No.	Description
SBSEN6	SB STEEL EDGE NOSING 6" X 10'-6"
SBSEN7	SB STEEL EDGE NOSING 7" X 10'-6"
SBSEN8	SB STEEL EDGE NOSING 8" X 10'-6"
SBSEN9	SB STEEL EDGE NOSING 9" X 10'-6"
SBSEN10	SB STEEL EDGE NOSING 10" X 10'-6"

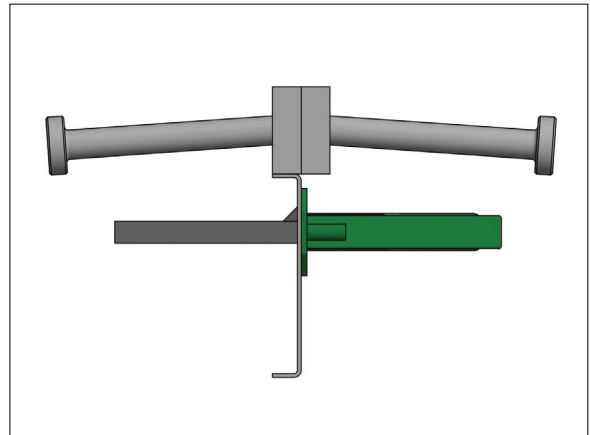

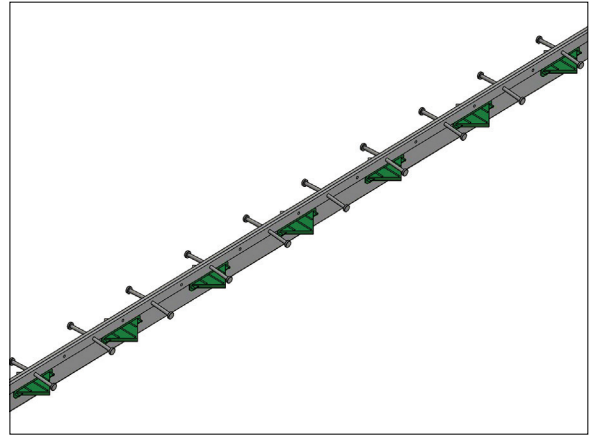

High-traffic concrete floors and pavements require precise load transfer, smooth transition and joint protection. All of this can be satisfied with the Steel Edge assembly.

The full-depth assembly includes steel nosing, studs, dowel plates and channel for joint installations. The leave-in-place design eliminates conventional slab edge forming costs.

The sleeves and dowels provide load transfer and free movement. Normal concrete expansion and contraction takes place as the dowel plate slides within the sleeve.

The Steel Edge assembly, with studs tied to the concrete slab reinforcement, provides joint edge protection and smooth transition from one concrete section to another.

The Steel Edge nosing with load transfer plates prevents spalling and reduces repair costs in high-traffic areas, like warehouses and loading docks.

Taper Dowel

Taper Dowel			
Part No.	Description	Price/ea	Lbs/ea
SBTD14SL	SB TAPER DOWEL 1/4" SLEEVE ONLY	\$1.05	0.1
SBTD38SL	SB TAPER DOWEL 3/8" SLEEVE ONLY	\$1.10	0.1
SBTD14PL	SB TAPER DOWEL 1/4" PLATE ONLY	\$2.10	1.5
SBTD38PL	SB TAPER DOWEL 3/8" PLATE ONLY	\$2.84	2.0

The size and diamond-shape of the Taper Dowel provides concrete joint stability, load transfer and smooth slab-to-slab transition, without restraining floor movement.

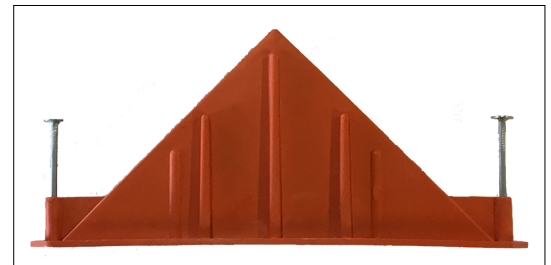

The plastic sleeve is nailed to lumber edge forms before concrete placement and the steel plate slides into the sleeve after forms are removed in preparation for the adjoining slab.

The Taper Dowel simplifies dowel installation, eliminates slab edge drilling and reduces labor costs for all types of ground level concrete slabs, including floors, flatwork and pavement.

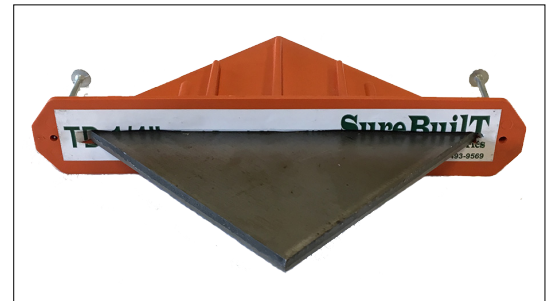

The plastic sleeve allows movement and the steel plate provides maximum bearing, bending and punching resistance, without the risk of slab interlock common with other methods.

A properly installed Taper Dowel is recommended for joints up to 0.20" wide and is suitable for all types of ground level concrete slabs, such as jointed floors, flatwork and pavement.

A Taper Dowel installation conforms to ACI 302.1R Guide for Concrete Floor and Slab Construction and ACI 360 Design of Slabs-on-Ground.

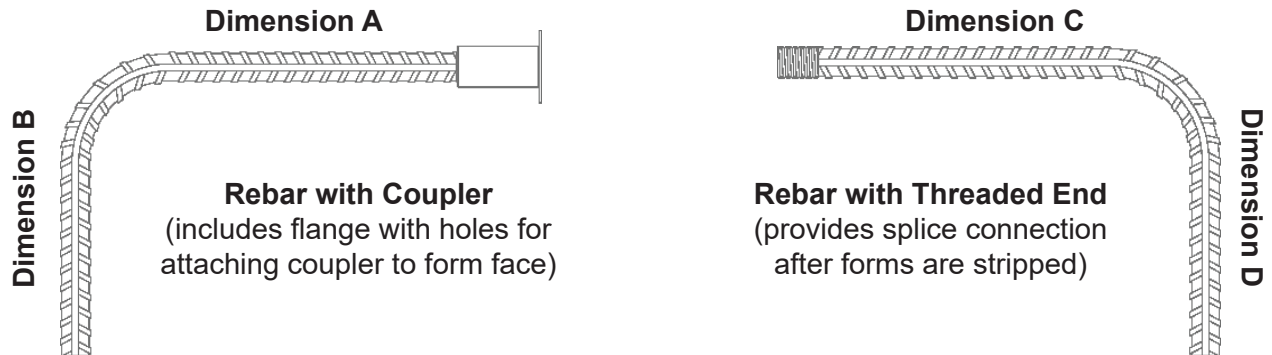

The dowel sleeve is quickly positioned and attached to edge forms, minimizing the related labor costs.

The steel dowel plate fits snugly into the sleeve, creating the load transfer between adjoining concrete slabs.

Form Saver

Contact a SureBuilt sales representative for pricing and availability.

Eliminate the hazards of protruding rebar and costs of form face replacement.

Provide the following information for each Form Saver assembly:

1. Identify the rebar sizes and number of units from project plans.
2. Provide Dimension A for each configuration.
3. Provide Dimension B for each configuration and indicate bend (if any) in degrees.
4. Provide Dimension C for each configuration, NC thread is standard.
5. Provide Dimension D for each configuration and indicate bend (if any) in degrees.

SBWOPB20MM	SB 20MM WELD-ON PIVOT BRACKET SET	39,200 lbs	\$17.43	7.1

* Safe Working Load (SWL) based on 2:1 safety factor
(Dependent on quality of field weld, materials, and thread engagement inside pivot bar)

The Weld-On Pivot Bracket can be attached to steel construction members, including steel piles, metal beams and weld plates, by following proper welding techniques. The pivot bar is typically furnished with coil thread, NC thread is available on request.

The Weld-On Pivot Bracket allows the tie rod to pivot a total range of 110°, or 55° in either direction to tie with forms. The bracket exceeds the tensile capacity of the pivot bar or threaded tie rod being used when properly installed by a certified welder.

To insure proper engagement the threaded tie rod must pass through the pivot bar a minimum of one diameter of the rod. An easy way to accomplish this is to position the tie rod perpendicular to the piling and thread it through the pivot bar until it comes in contact with the piling.

Metal Rib

Metal Rib			
Part No.	Description	Price/ea	Lbs/ea
SBMMETALRIB	SB METAL RIB 27" X 97"	\$19.25	11.9

Metal Rib Product Specifications	
Part No. - Made in USA	SBMMETALRIB
Sheet Size	27" x 97"
Surface/sheet	18sq.ft
Pallet/Ordering	250 pcs/4500sq.ft
Rib Space	3.80
Overlap	2" at overlap
Tie Wire Spacing	6"
Support Spacing (20" Height)	24" at 210 psf
Sheet Thickness	26 Gauge
Weight per sq.ft	0.66 lbs
Weight per sheet	11.9 lbs

- Reduces labor and material costs compared to traditional forming methods for wall joints and "buried" applications.
- Saves cycle time because the sheet remains in place, only supports and bracing are removed, and form stripping is eliminated.
- Allows concrete placement to be visually monitored, reducing the risk of voids and "honeycombing."
- Simplifies form joints and piercing so rebar operations can continue, or be revised, with minimal obstructions.
- Provides a quick-to-install joint option in the event of schedule change, ready-mix interruption or other unanticipated problem.
- Utilizes the existing rebar in structures, like grade beams and pier caps, to eliminate placing and removing temporary supports.
- Eliminates the cost associated with handling, setting, stripping and cleaning conventional formwork.

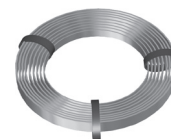

This leave-in-place sheet is typically used to form footings, bulkheads, grade beams, pile caps and blindside walls. The expanded metal sheets are easy to cut, lap, splice, bend and pierce, minimizing related forming costs. When concrete is placed, the ribs and mesh are embedded in the structure, providing a rough surface for subsequent concrete placement.

All-steel design in lengths from 7'6" to 62'6" for precast and tilt-up bracing applications

Adjustable Pipe Braces have a telescoping pipe for rough dimension and a 6" threaded connecting shoe for final adjustment. There are four sizes ranging from 7'-6" to 40'-0".

Fixed Pipe Braces are a standard length with a threaded connecting shoe for final adjustment. There are four sizes of Fixed Pipe Brace, including extensions, ranging from 16'-6" to 32'-3".

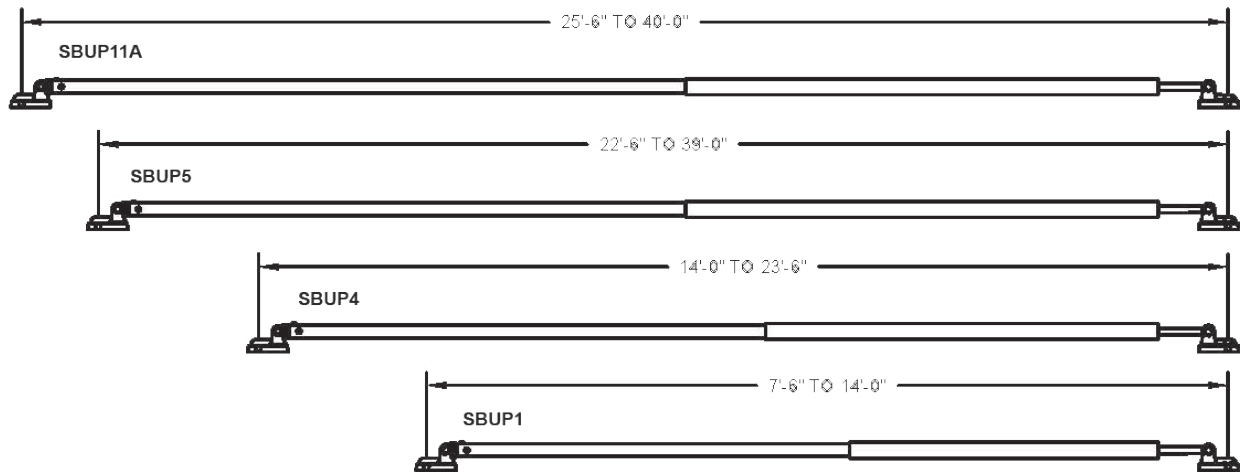

The Heavy-Duty Fixed Pipe Braces are a larger diameter pipe that provides greater capacity. There are four sizes ranging from 31'-9" to 53'-3".

Note; Pipe braces should always be inspected for unusual wear or damage after each use. Any pipe brace with missing parts, dents or kinks, indications of heating or other damage, should not be used until properly repaired.

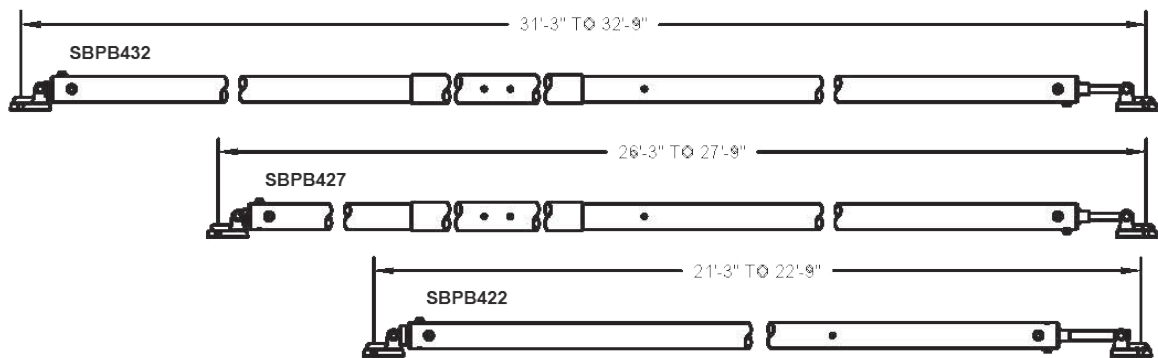

Prices and specifications subject to change without notice.

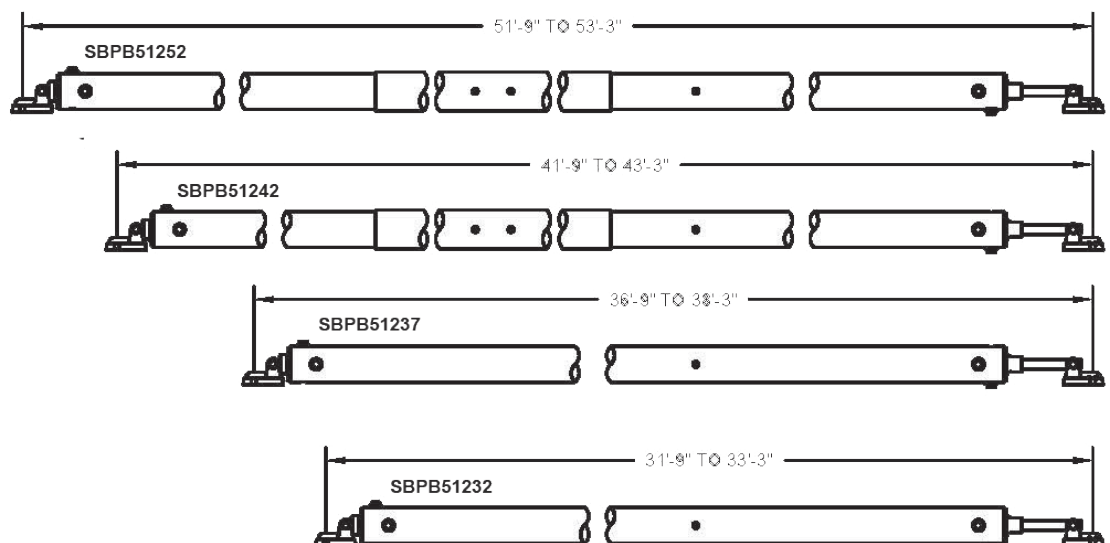

Adjustable Pipe Braces

Fixed Pipe Braces (4" diameter)

Heavy-Duty Fixed Pipe Braces (5-1/2" diameter)

Pry Bar

Pry Bar			
Part No.	Description	Price/ea	Lbs/ea
SBPB3	SB PRY BAR 56" w/ 3" BLADE	\$69.50	14.0

A SureBuilt Pry Bar, sometimes called a “Burke Bar,” provides the leverage needed on every job site.

Each durable Pry Bar is made with a structural steel tube, welded to a curved steel blade, and reinforced at the neck. The 3"x12" blade is optimally curved for more leverage, tapered for better prying, and notched for removing spikes. The Pry Bar is powder-coated for a smooth “feel” and capped with a non-slip soft grip.

The SureBuilt Pry Bar is 56" long and weighs 14 lbs. It provides a unique balance of strength-to-weight for leverage on most concrete forming applications, including aligning forms, “nudging” gangs, removing fasteners, and stripping panels.

Prices and specifications subject to change without notice.

Rebar Cap

Rebar Cap			
Part No.	Description	Price/ea	Lbs/ea
SBDISC10	SB REBAR CAP - ROUND TOP	\$1.02	0.43

Notes:

- Meets OSHA 1926.70(b) requirement.
- Cap reinforced with steel plate, providing additional protection against falls that occur from an angle.
- Fits rebar sizes #3 through #8, or 3/8 (10MM) to 1 inch (25MM) in diameter.
- Overall height of cap is 2-5/8 inches. Diameter across top is 4-3/8 inches.
- Packaged 25/box.

SPAN-X Beams

SPAN-X Beams			
Part No.	Description	Price/ea	Lbs/ea
SBSPANX46	SB SPAN-X 4-6 ALUMINUM BEAM	\$242.50	35.0
SBSPANX610	SB SPAN-X 6-10 ALUMINUM BEAM	\$388.50	50.0
SBSPANX915	SB SPAN-X 9-15 ALUMINUM BEAM	\$511.50	75.0
SBSPANX119	SB SPAN-X 11-19 ALUMINUM BEAM	\$631.50	95.0

The SPAN-X Beam consists of an aluminum box shape, with a telescoping I-beam that provides a range of adjustment. A single Camber Nut sets both the beam length and camber. The End Tabs support the beam and loads during construction.

The SPAN-X Beam is designed as a self-spanning support. Once the beam is set to length, it can be positioned along the top of a concrete wall, shelf angle or stringer. The beam spacing is determined by the anticipated loads (see tables).

A clear span provides more accessible work space in confined areas and reduces conflict with other trades. Using SPAN-X Beams saves time and speeds construction compared to other shoring methods.

SPAN-X Beams have been used for box culverts, shaft core roofs, sand filters, water channels and other similar concrete deck support applications.

SPAN-X Beam Extension Range

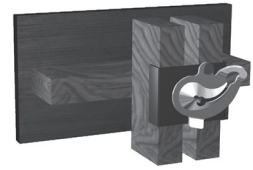

Part No.	Minimum Span	Maximum Span
SBSPANX46	3'-4"	6'-1"

Long End Application
with Strongback

Notes:

- Long End (LE) measures 8-1/4" at each end, plus wall thickness.
- Standard 1" breakback.
- Plastic 1"x1" cone standard. Optional plastic 1-1/2" or 2" cone on request.
- Safe working load of a Snap Tie LE is 2,250 lbs (Safety Factor 2:1).
- Fractional sizes priced to the next full dimension and available on request.
- Non-Optional water-resistant neoprene washer for additional \$0.75 per tie.
- Optional hex head design available for no additional charge on request.
- Add \$40 for each type and size ordered in "less than 100" quantity.

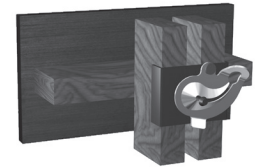

Optional Neoprene
Washer

Long End Application
with Strongback

Notes:

- Long End (LE) measures 20.95 cm at each end, plus wall thickness.
- Standard 2.54 cm breakback.
- Plastic 2.54 cm x 2.54 cm cone standard. Optional plastic 3.81 cm or 5.08 cm cone on request.
- Safe working load of a Snap Tie LE is 1020 kg (Safety Factor 2:1).
- Fractional sizes priced to the next full dimension and available on request.
- Optional water-resistant neoprene washer for additional \$0.75 per tie.
- Optional hex head design available for no additional charge on request.
- Add \$40 for each type and size ordered in "less than 100" quantity.

Optional Neoprene
Washer

Snap Tie Spacing Recommendation

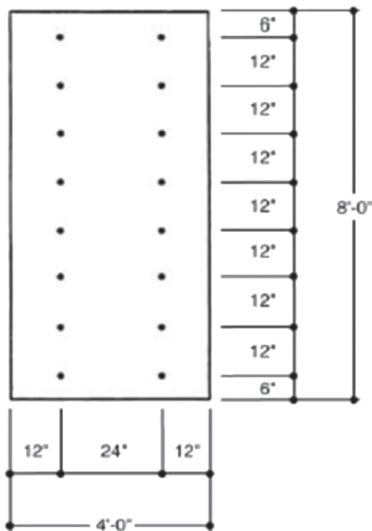

Suggested Spacing Diagrams For Snap Tie System

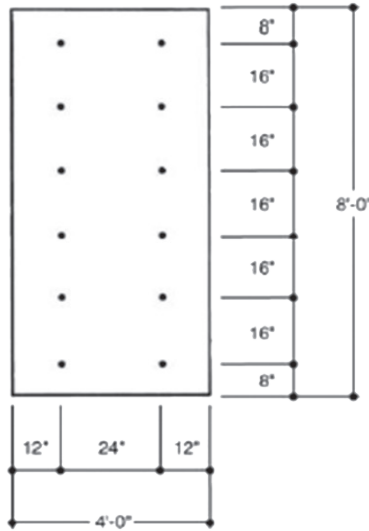

- A 9/16" drill bit is used for drilling the Snap Tie holes

This diagram is based on:

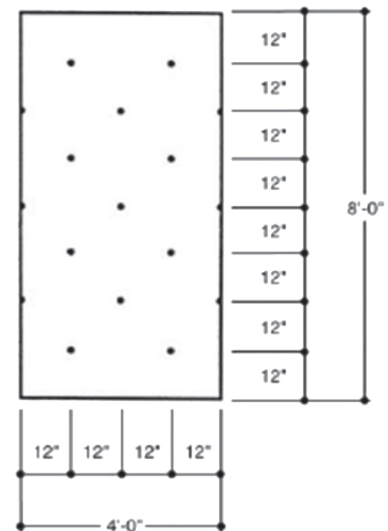

- 3/4" plywood thickness, face grain perpendicular to walers
- Standard 16" waler spacing with 2x4 lumber
- Pour pressure of 450 psf with L/360 deflection
- Pour pressure of 750 psf with L/360 deflection with 12" spacing

Recommended Snap Tie spacing for **rate of pour at 4-1/2 feet per hour at 70°**

Recommended Snap Tie spacing for **rate of pour at 2 feet per hour at 70°**

Recommended Snap Tie spacing for **rate of pour at 2 feet per hour at 70°**

Plywood deflection is the limiting factor in the diagrams above. When it is desired to have reduced deflection or a higher pour rate is required, the waler spacing should be decreased for the added pressure.

Staybox

Staybox (Rebar-Dowel Bar Key Way) is a two piece system of pre-assembled rebar and box keyway unit.

Staybox is made in two halves from steel or galvanized sheet metal per customer requirement. Typical dimensions are: 1-1/2" deep; by 2-1/2", 3-1/2", 6" or 8" wide; by 48" long. Those are standard sizes but Staybox can be fabricated in almost any shape required.

The Staybox assembly is tied to the existing rebar and fastened to the formwork before concrete placement. The front portion of the Staybox is removed and the rebar is bent into position, then tied in place for the subsequent concrete pour.

Steel Stakes

Stake with Nail Holes - 3/4" Diameter (.718 Bar)

SBSS3448D	SB 3/4" X 48" STAKE w/o HOLES	\$7.55	5.5

Notes:

- Available with or without holes for nailing.
- Each stake is hot-rolled with a "pencil" point.
- Packaged in quantities of 10 stakes per carton.

Prices and specifications subject to change without notice.

Stud Rail - DSA Reinforcement

Stud Rail is a double-headed stud anchor (DSA) reinforcement system, typically used for concrete deck-to-column connections. The system is designed to transfer the load further into the concrete deck, create a larger shear area around the column, and resist punching shear forces.

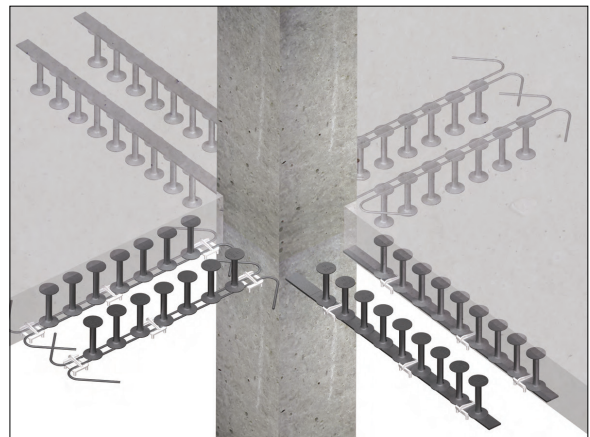

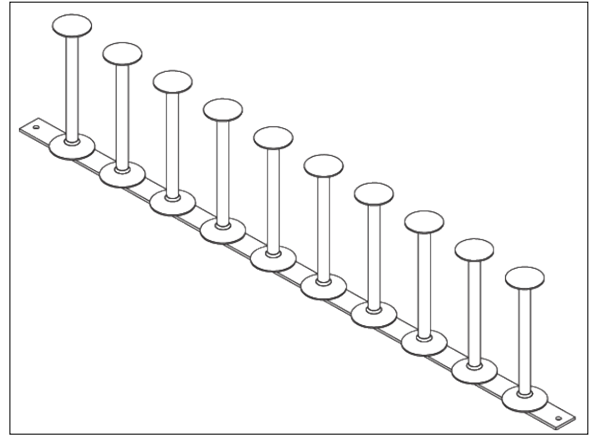

Using the Stud Rail system can also eliminate the need for forming column capitals or drop heads. This provides significant savings, since these column details are difficult to form and place.

Each stud is double-headed so the load transfer is equal at the top and bottom of the Stud Rail assembly. Each stud is available in different sizes to match the engineered loads for each project.

The Stud Rail assembly is available with an optional bottom strap or top wire, allowing the contractor to determine the installation sequence. The assembly can be positioned before or after structural reinforcement and/or post-tension tendons are placed.

The Stud Rail assembly is engineered for every connection, on every floor, on every project. During production, each assembly is color-coded to correspond with the shop drawings for site installation.

This detailed planning eliminates field welding and reduces installation time, providing significant labor-savings and better shear load transfer.

Stud Rail

Stud Rail - 3/8" x 6"

Part No.	Description	Price/ea	Lbs/ea
SBDSAR3865	SB STUD RAIL 3/8" X 6" 5 STUDS	\$12.86	1.50

SureCurve™ RC Forming System

Concrete tanks and curved walls quickly take shape with the SureCurve™ RC forming system

Each SureCurve panel has a series of turnbuckles that flex the form to a desired radius. Panels can then be joined and stacked to create large gangs.

The large SureCurve gangs are assembled with a lever-actuated connecting clamp. This reduces assembly time and simplifies any reconfiguration.

The connecting clamp, in combination with three different SureCurve panel sizes, can be used to form a radius dimension as small as 10'.

When stacking SureCurve panels in a gang, a stacking plate is used to span the panel joint and bolted to the exterior vertical ribs.

Properly spaced taper ties are typically used to maximize the 1,250 psf allowable pressure rating of the SureCurve forming system.

A waler assembly is pinned to the horizontal tube struts. This assembly distributes the taper tie load to the panel components.

The same waler assembly has holes along the channel. These holes provide tie-off points for fall protection and a place to store taper ties.

Safe working access for concrete placement is provided when walkway brackets are properly spaced, bolted and decked with each gang.

Small dimensions between SureCurve panels or gangs are completed with a lumber filler and adjustable connecting clamp.

Assembled SureCurve gangs are moved by crane, then braced in position. A brace shoe attachment plate provides for connection.

The SureCurve panels can be assembled into a gang, including all the connecting hardware and accessories, while safely on the ground.

Connecting clamps and stacking plate span the joint between two SureCurve panels.

SurePly™ Forming System

The most economical, versatile and efficient way of forming small and large projects, cut-up or complicated jobs, handset or gangform applications.

- Rugged frame with 45% more weld than others
- High-carbon 55,000 PSI structural steel frame
- Full 2"x2" crossmember support angle every foot
- Integral handle for carrying and setting
- Baked-on powder paint in 12 optional colors
- Long-lasting 1/2" Birch or optional HDO plywood
- Allowable 1000 psf load-rated system
- Panels in heights from 3' to 10', width 1" to 36"
- Fillers in heights from 3' to 10', width 1" to 36"
- Adjustable Column Forms in heights from 3' to 10'
- Additional dado slots make step footings easy
- Minimal hardware for more forming productivity

* Dealer discount on form renovation services is 10% off.

* Add 10% for each size with less than 5 pieces.

* Add 10% for orange or yellow colors.

Form Renovation can be performed on most steel-frame, plywood-face handset systems, including the Ellis Pro-Form, EMI Elite, Symons Steel-Ply and SureBuilt SurePly brands.

Form Renovation includes the following standard operations:

- Remove plywood from frames
- Inspect and sort frames
- Spotweld frames (incidental only as needed)
- Shotblast frames
- Paint frames
 - Standard red powder-coat, 12 color options available
 - Additional 10% charge for yellow and orange finish
- Install new plywood in frames
 - Standard 1/2" birch plywood (220/220 overlay)
 - Optional 1/2" HDO plywood (100/30 overlay)
 - Optional alkus® panel
 - Or your preferred choice of material

Form Renovation does not include the following:

- Inbound or outbound freight charges
- Replacement crossmembers, end rails, handles, etc.
- Welding \$50/hr (other than incidental)

Terms and Conditions

These terms and conditions apply to all sales of SureBuilt products. These terms are specifically incorporated into any quotation or proposal issued by SureBuilt to Customer. Any terms contained in a purchase order issued by Customer which Terms and Conditions and the quote or proposal issued by SureBuilt are null, void and of no effect.

1. Purchase Price and Payment:

Quotations or proposals made to Customer by SureBuilt are only valid for a period (30) days and then only for the prices, quantities, sizes and normal shipping. Purchase orders placed beyond (30) days of the original quotation, will be priced at the then prevailing price, quantities available and delivery schedule available.

- a) Customer agrees to pay all applicable Federal, State, or Local revenue, excise, sales, transfer, use or similar taxes, including tariffs that may be imposed on any component material which increases the cost of the Product. Customer shall provide SureBuilt with a suitable tax-exempt certificate acceptable to taxing authorities if Customer claims that the transaction is tax exempt. Customer is not obligated to pay SureBuilt's income taxes on account on these Terms and Conditions.
- b) Customer shall pay for all non-standard, non-stock and/or made to order Product even if Customer cancels the order and the Product does not ship. Customer shall be invoiced at the time of shipment and payment is due no later than (30) days after the date of invoice. All amounts due shall not be subject to set-off, deductions, or any counterclaim made by Customer. Customer agrees to pay a service charge at the rate of 1.5% per month on all balances due after (30) days. SureBuilt may refuse to ship any Product to Customer when Customer has any invoices that are past due.
- c) Title to the Product does not pass to the Customer until all amounts due to SureBuilt are paid in full and SureBuilt retains a security interest in the product which may be formalized by filing under the Uniform Commercial Code.

2. Delivery:

The date of delivery shall be as stated in the quotation if specified, otherwise at the time that SureBuilt has the Product available for shipment. All shipments are F.O.B. at or will be SureBuilt's place of business. Customer assumes all risks and liability for damage, delay or loss associated with the delivery and/or transportation of the Product. SureBuilt assumes no liability for loss, damage or consequential damages due to delays in shipment or failures for any reason. If Customer requests SureBuilt to arrange for shipment, then SureBuilt shall add 5% of the product price as a fee for making those arrangements. In all events Customer shall remain liable to pay all costs of shipment. In no event will SureBuilt be identified as the shipper or accept any bill of lading whereby it is identified as the shipper. For Customer pick up at SureBuilt's facility, SureBuilt will hold the product on its docks for no more than (5) days. If Customer does not take delivery by the end of the fifth day, the product will be restocked and Customer will be charged a 25% restocking charge. If the item is a non-standard item, Customer will be billed for the full quoted price and SureBuilt will have no obligation to retain or store the product and may dispose of it in any suitable fashion.

3. Inspection and Claims:

Customer shall inspect the Product upon receipt at the destination and notify SureBuilt in writing of any shortages, damages to or defective products within (72) hours of delivery. Failure of Customer to timely notify SureBuilt of any shortages, damage to or defective products shall constitute waiver of liability against SureBuilt.

4. Limited Warranty:

For a (6) month period from the date of shipment, SureBuilt warrants that the Product sold to Customer shall be free from defect in material and workmanship. SureBuilt's sole obligation under this warranty is to repair or replace defective product at no charge to Customer. In order to obtain the benefits of this limited warranty, Customer must return at its expense the Product or component part thereof found to be defective at the time of delivery. SureBuilt shall have no obligation under this warranty to repair or replace consumable components of the Product. SureBuilt shall also not have an obligation under this warranty if:

- a) repair or replacement is a result of normal wear and tear or necessitated in whole or in part by catastrophe or causes external to the product;
- b) the product has been maintained, repaired, reconfigured, modified or adapted in any manner;
- c) the product has not been properly used or maintained for the purpose for which it is intended;
- d) the customer does not notify SureBuilt in writing during the warranty period with specific detail of any defect in the product;
- e) the customer or any of its personnel have attempted to repair or replace or modify the product or any component part;
- f) the customer is past due on any money due to SureBuilt.

This warranty is exclusive of and is in lieu of all other warranties, expressed or implied, including without limitation any warranty of merchantability or fitness for a particular purpose. This warranty is not transferrable, assignable and is void and of no effect in the event that the product is transferred by customer to any third party.

Terms and Conditions (continued)

5. Limitation of Liability:

SureBuilt is not liable for its failure to fulfill its obligations due to causes beyond its control. In no event will SureBuilt be liable for any incidental or consequential damages, including but not limited to damages for loss of profit or revenue, loss of capital, claims of customer for service interruptions, or failure to supply, down time, testing or installation cost or costs of substitute products, facility or services, even if SureBuilt has been advised of the possibility of such potential damages or for any claim against the customer by any other party. Customer agrees that any basis for imposing liability on SureBuilt for property damage, personal injury or death or legal expenses relating to the sale or use of SureBuilt product shall be void and unenforceable. The total liability of SureBuilt on any claim, whether in contract, tort, including negligence or otherwise, arising out of, connected with or resulting from the manufacture, sale, delivery, repair, replacement or use of the Product or component part of the Product will not exceed the price allocable to the Product or component part thereof which gives rise to the claim. SureBuilt's total liability to customer for damages, from any cause whatsoever, and regardless of the form of action, whether in contract or in tort, including negligence, is limited to actual damages up to the purchase price paid for the Product or any component part thereof that caused the damages or is the subject matter of the sale of the Product or directly related to the cause of action.

6. Force Majeure:

In no event shall SureBuilt be liable for any losses or damages including incidental or consequential damages, delays or defaults occasioned by: a) acts of God or public enemy; b) acts of the United States or any states or political subdivision thereof; c) fires, floods, explosions, or other catastrophes; d) epidemics and quarantine restrictions; e) strikes, slowdowns or labor stoppage of any kind; f) freight embargos, unusually severe weather; g) delays of a supplier; h) material shortages, or i) causes beyond the control of SureBuilt.

7. Indemnification by Customer:

Customer shall be responsible for, indemnify, defend and hold SureBuilt harmless from and against all liabilities, claims, judgments, costs, damages and expenses (including reasonable attorney fees and expenses), including for personal injury, death, property damage or otherwise, arising out of or relating to the use of the Products and/or the Services and any other act, or omission by Customer or any subcontractor, agent, sublessee, employee, or purchaser of or from Customer with respect to the Products and/or Services, unless resulting from the gross negligence or willful misconduct of SureBuilt. If Customer resells purchased Products, Customer shall include language in an agreement that makes these Terms (including the limitations in paragraph 4) binding on any subsequent purchasers of the Products, including binding the purchaser to these obligations of indemnification, in addition to Customer. Customer represents to SureBuilt that it and its employees and agents are knowledgeable and experienced about the Product and familiar with the use of the Product and that they are not relying on SureBuilt or any representation made by SureBuilt, its salesman, agents, as made in any catalog or otherwise, but that Customer is relying solely on its own expertise and evaluation or expertise of its retained professionals and that Customer has made a separate and independent verification and analysis that the product will meet all standards required in the application for which Customer intends to use the Product.

8. Documentation and Product Data:

Any specifications, plans, drawings or application recommendations furnished by SureBuilt to Customer ("Documentation") are provided only as a service to Customer to conceptually illustrate the assembly and use of Products. Such Documentation is not intended to be fully directive nor to cover all engineering details on Products, or on products or materials not furnished by SureBuilt, or on their interconnection. Inasmuch as SureBuilt does not control jobsite assembly or procedures, grade or quality of materials, and/or equipment supplied by others, it is the responsibility of Customer to integrate Documentation into composite drawings and information suitably complete for construction purposes. In the case of non-standard, non-stock, and/or made-to-order Products, design drawings will be furnished by SureBuilt for Customer approval prior to production. SureBuilt shall not be responsible for any deviations, changes or alterations to the recommended assembly details described in drawings, unless such deviations, changes or alterations are illustrated in a revised design drawing provided by SureBuilt. SureBuilt shall at all times retain ownership of all Documentation and other technical data ("Product Data") with respect to the Products and Services, and unless authorized by SureBuilt, Customer shall not disclose any such Product Data to any other person. Upon request, Customer shall promptly return all Product Data to SureBuilt. Customer shall not reverse engineer, copy any documentation or product description or other engineering on any product sold by SureBuilt to Customer.

9. Expenses and Attorney Fees:

All costs and expense incurred by SureBuilt in connection with the enforcement of any of these Terms or any quotation, including a legal action to enforce or interpret any provision of these Terms and the quotation, shall entitle SureBuilt to the payment of all costs and expenses including reasonable attorney fees in enforcing these Terms and Conditions and the sale of any product to Customer.

10. Compliance with Governmental Requirements:

Customer must, at the time of placing its order with SureBuilt, specify any governmental regulations or specifications with respect to the product. No mere reference to government specifications or regulations shall be sufficient to include that specification or regulation as a part of sales of product to the Customer.

Terms and Conditions (continued)

11. Substitutions:

SureBuilt reserves the right to make changes in design, material or accessories or component parts of the Product at any time without incurring any obligations to provide the same Product previously purchased or continue to supply obsolete product or component parts. SureBuilt reserves the right to substitute Product or component parts of product at any time provided that the substituted Product or component parts shall perform the functions intended by the original product or component parts.

12. Waiver:

Any waiver by SureBuilt of a breach on any of these Terms and Conditions and of the quote or purchase order based upon said quote, shall not operate as or be construed to be a waiver of any other breach of such provision or of any breach of any other provision. The failure of SureBuilt to insist upon strict adherence to any Term or Condition, on one or more occasion, shall neither be considered a waiver nor deprive SureBuilt of any right thereafter to insist upon strict adherence to that Term or Condition.

13. Consultation:

In the event that Customer requests that SureBuilt provide advice, consultation, or direction, in connection with the installation of or integration of the Product into or on the jobsite, then at SureBuilt's sole discretion, SureBuilt may charge a fee based upon costs, including travel and an hourly fee. Customer shall be advised in advance that SureBuilt intends to charge a consultation fee.

14. Governing Law and Exclusive Jurisdiction:

The Contract shall be governed by, and construed in accordance with, the laws of the State of Illinois and venue for any legal proceeding or arbitration concerning this contract shall be in the Circuit Court for the Eighteenth Judicial Circuit, DuPage County, Illinois and in no other venue. Each party, knowingly and after consultation with counsel, for itself, its successors and assigns, reserve all right to trial by jury of any claim arising with respect to this agreement or any matter related in anyway thereto.

15. Miscellaneous:

These Terms and Conditions may not be amended, except in writing and only when signed by an authorized SureBuilt representative. The agreement between SureBuilt and Customer is not assignable by Customer without the prior written consent of SureBuilt. Any provisions of the agreement between SureBuilt and Customer that is invalid under applicable law or Court Order shall not in any way invalidate any remaining provisions of the Terms and Conditions. The Terms and Conditions and the agreement which arises between the parties may not in any way be explained or supplemented by a prior existing course of dealings between the parties, by any usage of trade or custom, any prior performance between the parties pursuant to the Terms and Conditions or otherwise and may not be modified in any way by subsequent orders, proposals, acknowledgments, or other communications which relate to the quote and/or these Terms and Conditions, unless specifically agreed to in writing by SureBuilt. Obvious typographical or clerical errors made by SureBuilt or Customer, at arriving the contract purchase price, number of units/products to be provided, are subject to correction, including clerical errors made in preparation of the quotation, acknowledgments or specifications.

Bar Support – Wire slab bolsters and high chairs, with optional epoxy-coat, plastic-dip, plastic-tip or plate, to meet almost any slab requirement.

Bridge Deck – Overhang brackets and hangers provide an efficient deck forming solution for precast concrete or steel I-beam bridge structures.

Coil Ties – 2-Strut and 4-Strut designs, in standard and heavy-duty capacities, with optional cones, waterseals or custom combination, for job-built forming.

Dowels – Plates, sleeves, baskets and joint nosings for high-performance concrete floors.

Euro Rod – 15mm and 20mm taper ties, she-bolts, inner ties, washers and wing nuts compatible with European-brand forming systems.

Metal Rib – Leave-in-place, expanded galvanized mesh to form footings, bulkheads, grade beams, pier caps and blindside walls.

Pipe Braces – Contractor-preferred braces, with rated capacities and lengths ranging from 7'6" to 62'6", for almost any forming application.

Precast – Inserts, anchors, connectors and lifting systems for efficient precast concrete production.

Self-Riser – Integrated hydraulic system for multi-story building cores that virtually eliminates crane time.

Shoring – A conventional 10K load/leg system, with base plates, cross braces, screw jacks and U-heads, for productive deck support.

Snap Ties – Ties and brackets, with $\frac{3}{4}$ " plywood and 2x4 lumber, create a simple and effective plywood forming system.

Staybox – A pre-engineered and pre-assembled rebar keyway that simplifies forming at wall and deck intersections.

Stud Rail – A reinforced column-to-deck connection that reduces shearing, transfers load further into the slab and eliminates column capitals.

SurePly™ – An industry-recognized handset system, with more than 80 standard panel and filler sizes, for almost any forming application.

Tilt-Up – A start-to-finish system of lifting inserts, plates and hardware for tilt-up panel construction.

Walers – Double channel walers align panels, carry taper tie loads and maximize the surface area of almost any gang.
